

DEPARTMENT OF THE AIR FORCE
AIR FORCE RESEARCH LABORATORY
ROBINS AIR FORCE BASE GEORGIA 31098-1639

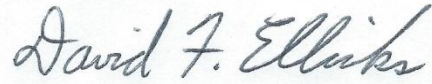

July 15, 2014

MEMORANDUM FOR Mr. Chris Howard
Opti-Blast Inc. (Cage Code: 08PL5)
4032 North Jackson Street
Jacksonville, TX 75766-5140

FROM: AFRL/RXSSR
325 Richard Ray Blvd., Bldg. 165
Robins AFB, GA 31098-1639

SUBJECT: APPROVAL OF OPTI-BLAST INC. T-2 MIL SPEC UREA (Type II) Mesh Size:
20-30 PLASTIC MEDIA (Lot/Charge Number – 1406A)

1. Our office has the responsibility for maintaining the list of qualified product manufactures conforming to MIL-P-85891 under a joint Memorandum of Agreement with all federal organizations. First article testing is performed on a no more than biannual basis according to the procedures described in MIL-P-85891. The latest round of testing for all suppliers was completed in July 2014. The authorized/approved PMB media types for MIL-P-85891 called out within T.O. 1-1-8 will be updated based on the test results submitted to our office.
2. In the interim, this letter is provided to Opti-Blast Inc. to indicate that their Type II media has passed the MIL-P-85891 first article testing (completed 15 July 2014), and is **approved** for use **until July 2017** or until our next round of testing is completed, if not removed earlier for non-conformance. At that time, Opti-Blast Inc. will be required to supply our office with a new 3rd party, 1st article test report per the newest version of Mil-P-85891. To remain on this Mil-P-85891 qualified product list (QPL), manufacturers must **requalify their product every 3 years, unless required earlier** from the date of this approval letter. Failure to re-qualify will be sufficient justification for removal from T.O. 1-1-8 and / or the Mil-P-85891 QPL, QPM or the new Qualified Products Database (QPD).
3. Our office has forwarded your approval/qualification to the Mil-P-85891 QPL by e-mail to Mr. Mark Giesbrecht at the General Services Administration with the same date as your letter.
4. This qualification to Mil-P-85891 is binding upon the manufacturer or suppliers in accordance with Defense Standardization Manual 4120.24-M and SD-6 document attached in electronic format.
5. Points of contact are Mr William P. Hoogsteden, AFRL/RXSSO, 937-656-4223 or DSN 986-4223, Mr Charles E. (Mac) McKenna, on-site Support Contractor, 1-478-926-9109 or DSN: 468-9109

A handwritten signature in black ink that reads "David F. Ellicks". The signature is written in a cursive style with a large, prominent 'D' and 'E'.

DAVID F. ELLICKS, DR11, DAF
Air Force Corrosion Prevention & Control Office
